— our glass is —
100% **recyclable**
& **ocean** SAFE

Sustainable. Reliable. California.

Gallo Glass is one of the top three wine container manufacturers in North America making over 2.5 million bottles daily. Located in Northern California, the newly renovated plant has the most advanced glass technology and is the only glass company dedicated to the wine and spirits industry.

Committed to clean and sustainable manufacturing, our bottles are made with up to 80% recycled glass and 100% of our raw materials are sourced from California. With four energy efficient oxy-fired furnaces to drastically reduce our environmental impact, we are engineered to support California's climate change initiative.

Our team is passionate about glass and the positive attributes associated with glass. Made from all-natural materials, glass is ocean friendly and 100% infinitely recyclable, creating an authentic premium package. Built on 60 years of glass making tradition, we've applied modern technology to produce the highest quality glass bottles. **Your direct local source of sustainable and reliable wine bottles made in California.**
